

archangel[®]
a better way

The logo features the word "archangel" in a dark blue, lowercase, sans-serif font. Above the "e" and "l" is a stylized infinity symbol with a color gradient from blue to orange. A registered trademark symbol (®) is positioned to the right of the word. Below "archangel" is the tagline "a better way" in a smaller, lowercase, sans-serif font.

a better way!

Four fundamental delivery pillars:

- **Connect** - any device, any platform, and any network
- **Assess** - use data holistically to deliver preventive and predictive models of care
- **Respond** - create rules, triage alarms, and distribute to the right people at the right time
- **Evolve** - build on a solid foundation platform to manage your a2d needs today and evolve your services.

Archangel a better way for C.A.R.E.

#abetterwayforcare

connect a better way

Future-proof your service. Unique interoperable gateway connects and integrates multi-vendor systems

- supports legacy A2D transition
- full range of security and social alarm protocols
- innovate and scale IoT solutions for Tele-Health
- monitors individual and environment
- connects TEC, external partners and internal business systems in one platform

Archangel® Interoperability Gateway

Integrate your own
technology via APIs

Communications

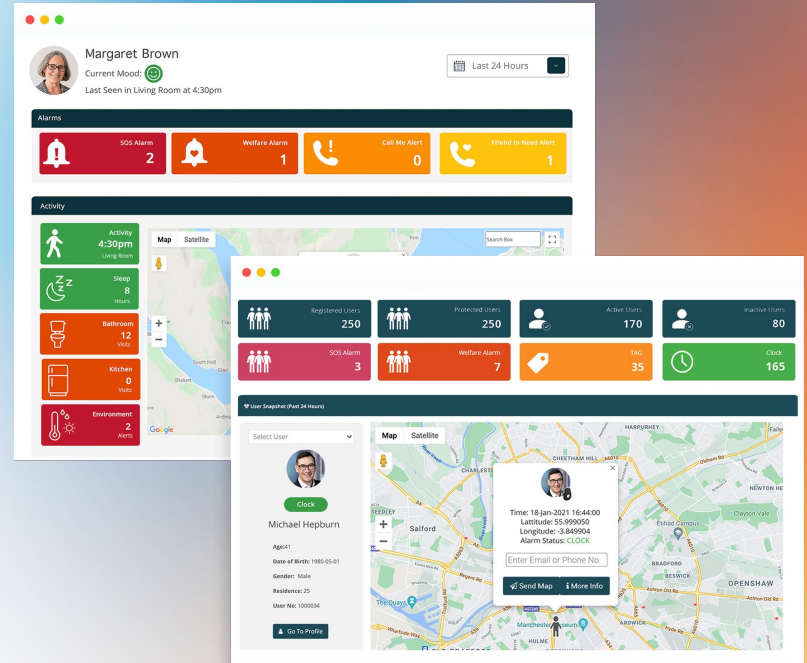

assess

A better way

Supporting organisations and care professionals to utilise and share data gathered from devices mitigating emergency response:

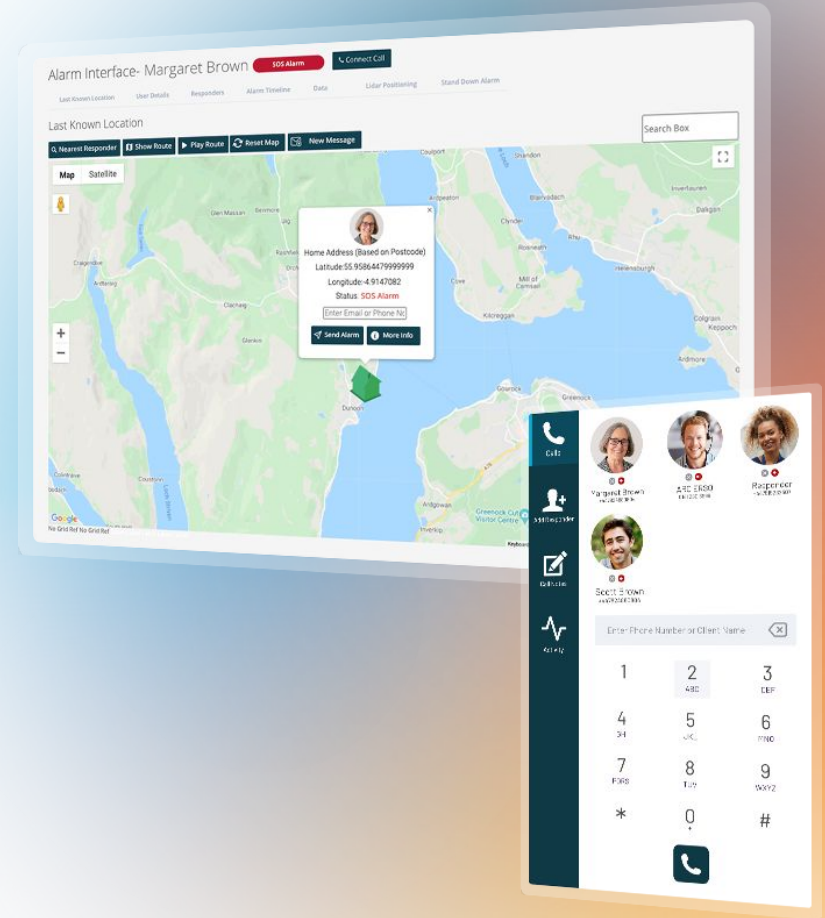

- data aggregation and population stratification
- predictive and preventative care modelling
- tailored dashboards, reports and infographics
- powerful data analytics coupled with rules, machine learning, and AI modelling enables holistic assessment of individuals and assets

respond a better way

flexible incident management

- Distributed Alerting
- Responder App.
- Skills Based Routing / Alerting
- Dynamic ARC routing
- Multi-channel communications

respond

distributed alerting

Building capacity into the ARC resource. Raise an alert to family members or community partners before finally arriving at the ARC.

- flexible business rules
- personalised alert plans supporting responder accessibility and equality
 - cascade responder alerting
 - broadcast alerting
 - flexible message formats e.g. SMS, email, Responder App
 - multimedia formats
 - multi-device capability

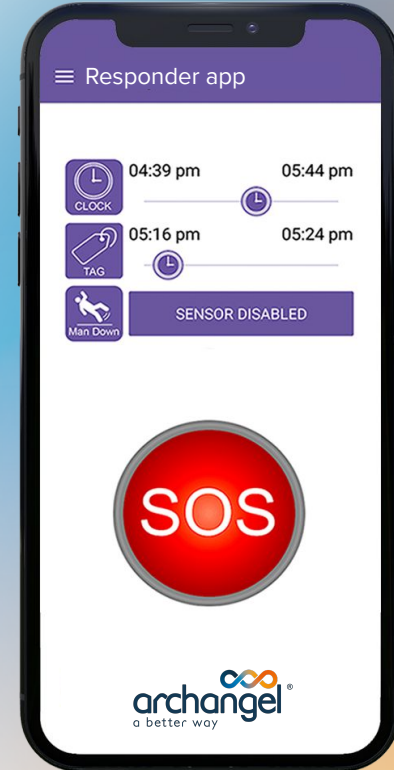

respond

responder app

Initiate remote responders as part of the pre-alarm process

- broadcast to responders “on the clock”
- match responder skill and availability
- prioritise available responders within range
- manage responder acceptance and feedback
- manage lone worker safety (BS8484 Compliant)
- enable key information to be shared

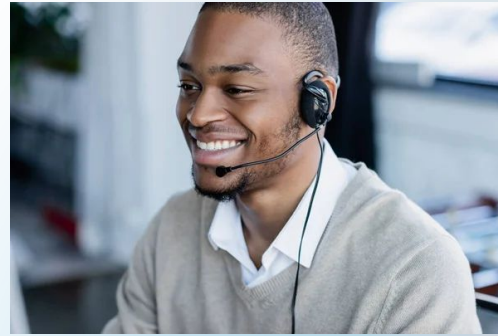

respond

skills-based alert routing

Configure alerts and alarms to most suitable or appropriately skilled operators

- direct alarms to appropriate operators based on skill sets required
- deliver alarms based on previous interactions with operators
- deliver alarms based on workload management
- build a knowledge base content to support operators and ongoing CPD

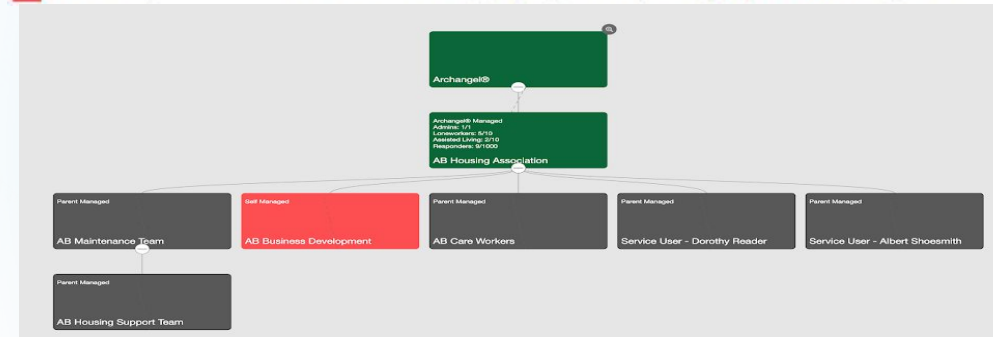

respond

dynamic ARC routing

flexible alarm management with local control and delivery

- Dynamic ARC routing
- Disaster recovery
- Home / remote working
- Shared ARC responsibilities
- Multi-channel communications

	Archangel® Managed:	Indicates groups managed only by Archangel®, parent Groups don't have access.
	Parent Managed:	Indicates an unmanaged group, related parent groups can manage them.
	Self Managed:	Indicates a self managed group, related parent groups cannot manage these.

Group ID	Group	Group Management	Apply to Child Departments	
135	34t34erges	Parent Managed	<input type="checkbox"/>	Edit Group
238	AB Business Development	Self Managed	<input type="checkbox"/>	Edit Group
240	AB Care Workers	Parent Managed	<input type="checkbox"/>	Edit Group
112	AB Housing Association	Parent Managed	<input type="checkbox"/>	Edit Group
114	AB Housing Support Team	Parent Managed	<input type="checkbox"/>	Edit Group
113	AB Maintenance Team	Parent Managed	<input type="checkbox"/>	Edit Group

evolve

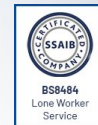

a better way

Archangel® provides confidence and resilience. With a pedigree earned since 1998, fully cloud platform that is built on a secured by design approach.

- Fully cloud based digital ARC platform
- Background in lone worker and security
- Open agnostic partner to data integration and interoperability
