Solutions overview

A phased approach to introducing new services

500+

Downloads of the blueprint makes it the TSA's most popular publication ever.

The interest and appetite for proactive and preventative care is high.

TSA support for Local Authorities

**Workshop the art
of the possible**

**Assess &
Recommend
changes to current
strategy**

**Offer guidance on
implementing the
Blueprint**

**Offer participation
in the Community
of Practice**

TSA support for Service Providers & Suppliers

**Assess &
Recommend
changes to current
strategy**

**Offer guidance on
implementing the
Blueprint**

**Offer participation
in the Community
of Practice**

Next steps

Choosing the Right Support

Now's the time to consider where TSA can best support your journey. We suggest taking the following steps:

- **Review the blueprint**
familiarise yourself with the stages and principles of proactive and preventative care.
- **Reflect on your current position**
identify where you are on the journey—what's already in place, what's underway, and what's still to come.
- **Assess your capability gaps**
consider where you have internal strengths, and where additional insight or expertise could help.
- **Prioritise support areas**
Use this to decide which TSA services will add the most value—whether it's a workshop, rapid assessment, advisory support, or joining the Community of Practice.

Next Steps

**Testing the
Blueprint**

**Developing the
Blueprint
through
Commission 2**

**Address other
barriers to P&P
use through
SRIG**

Thank you
