**“More people to care for,
fewer people to care for them”**

Baroness Casey, Nuffield Trust Summit, 2026

Cost to fill vacant posts

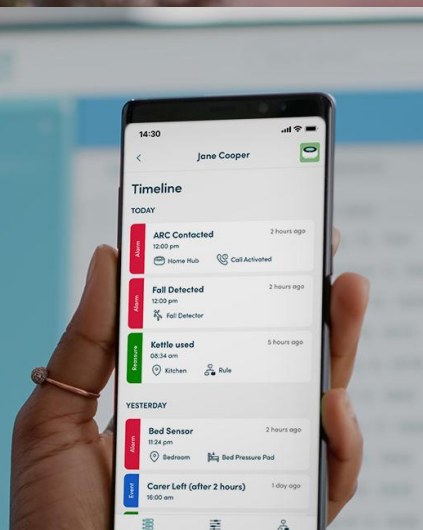

Budget on TEC

TEC-first: enabled by integrated insights

Family Carer

→ Family App

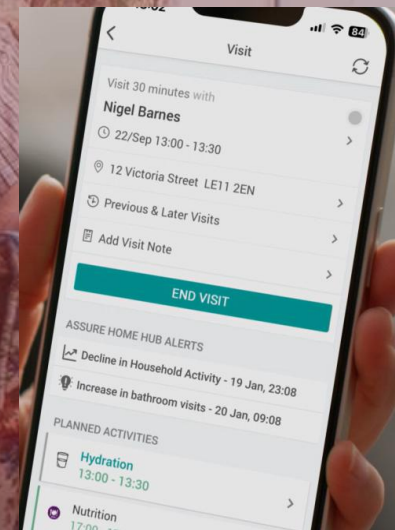

My daughter is less worried as she can see that I'm managing on my own

Care Provider

→ Care Planning app

My carer checks their app to prioritise and right-time my home visits & video care calls

Social Worker

→ Care Record

We use insights to plan my support and can see I no longer need overnight care

Monthly AI Summary

Over the last month, the daily activity levels of the subject have shown interesting patterns, with notable differences between weekdays and weekends. The data, collected from various activities throughout the night, provides insights into the lifestyle and habits.

Daily Routine:

Daily Monitoring Alerts ⓘ

 Bathroom Visits

Slightly Higher

 TV Duration

Moderately Higher

 Full Day Activity

Significantly Lower

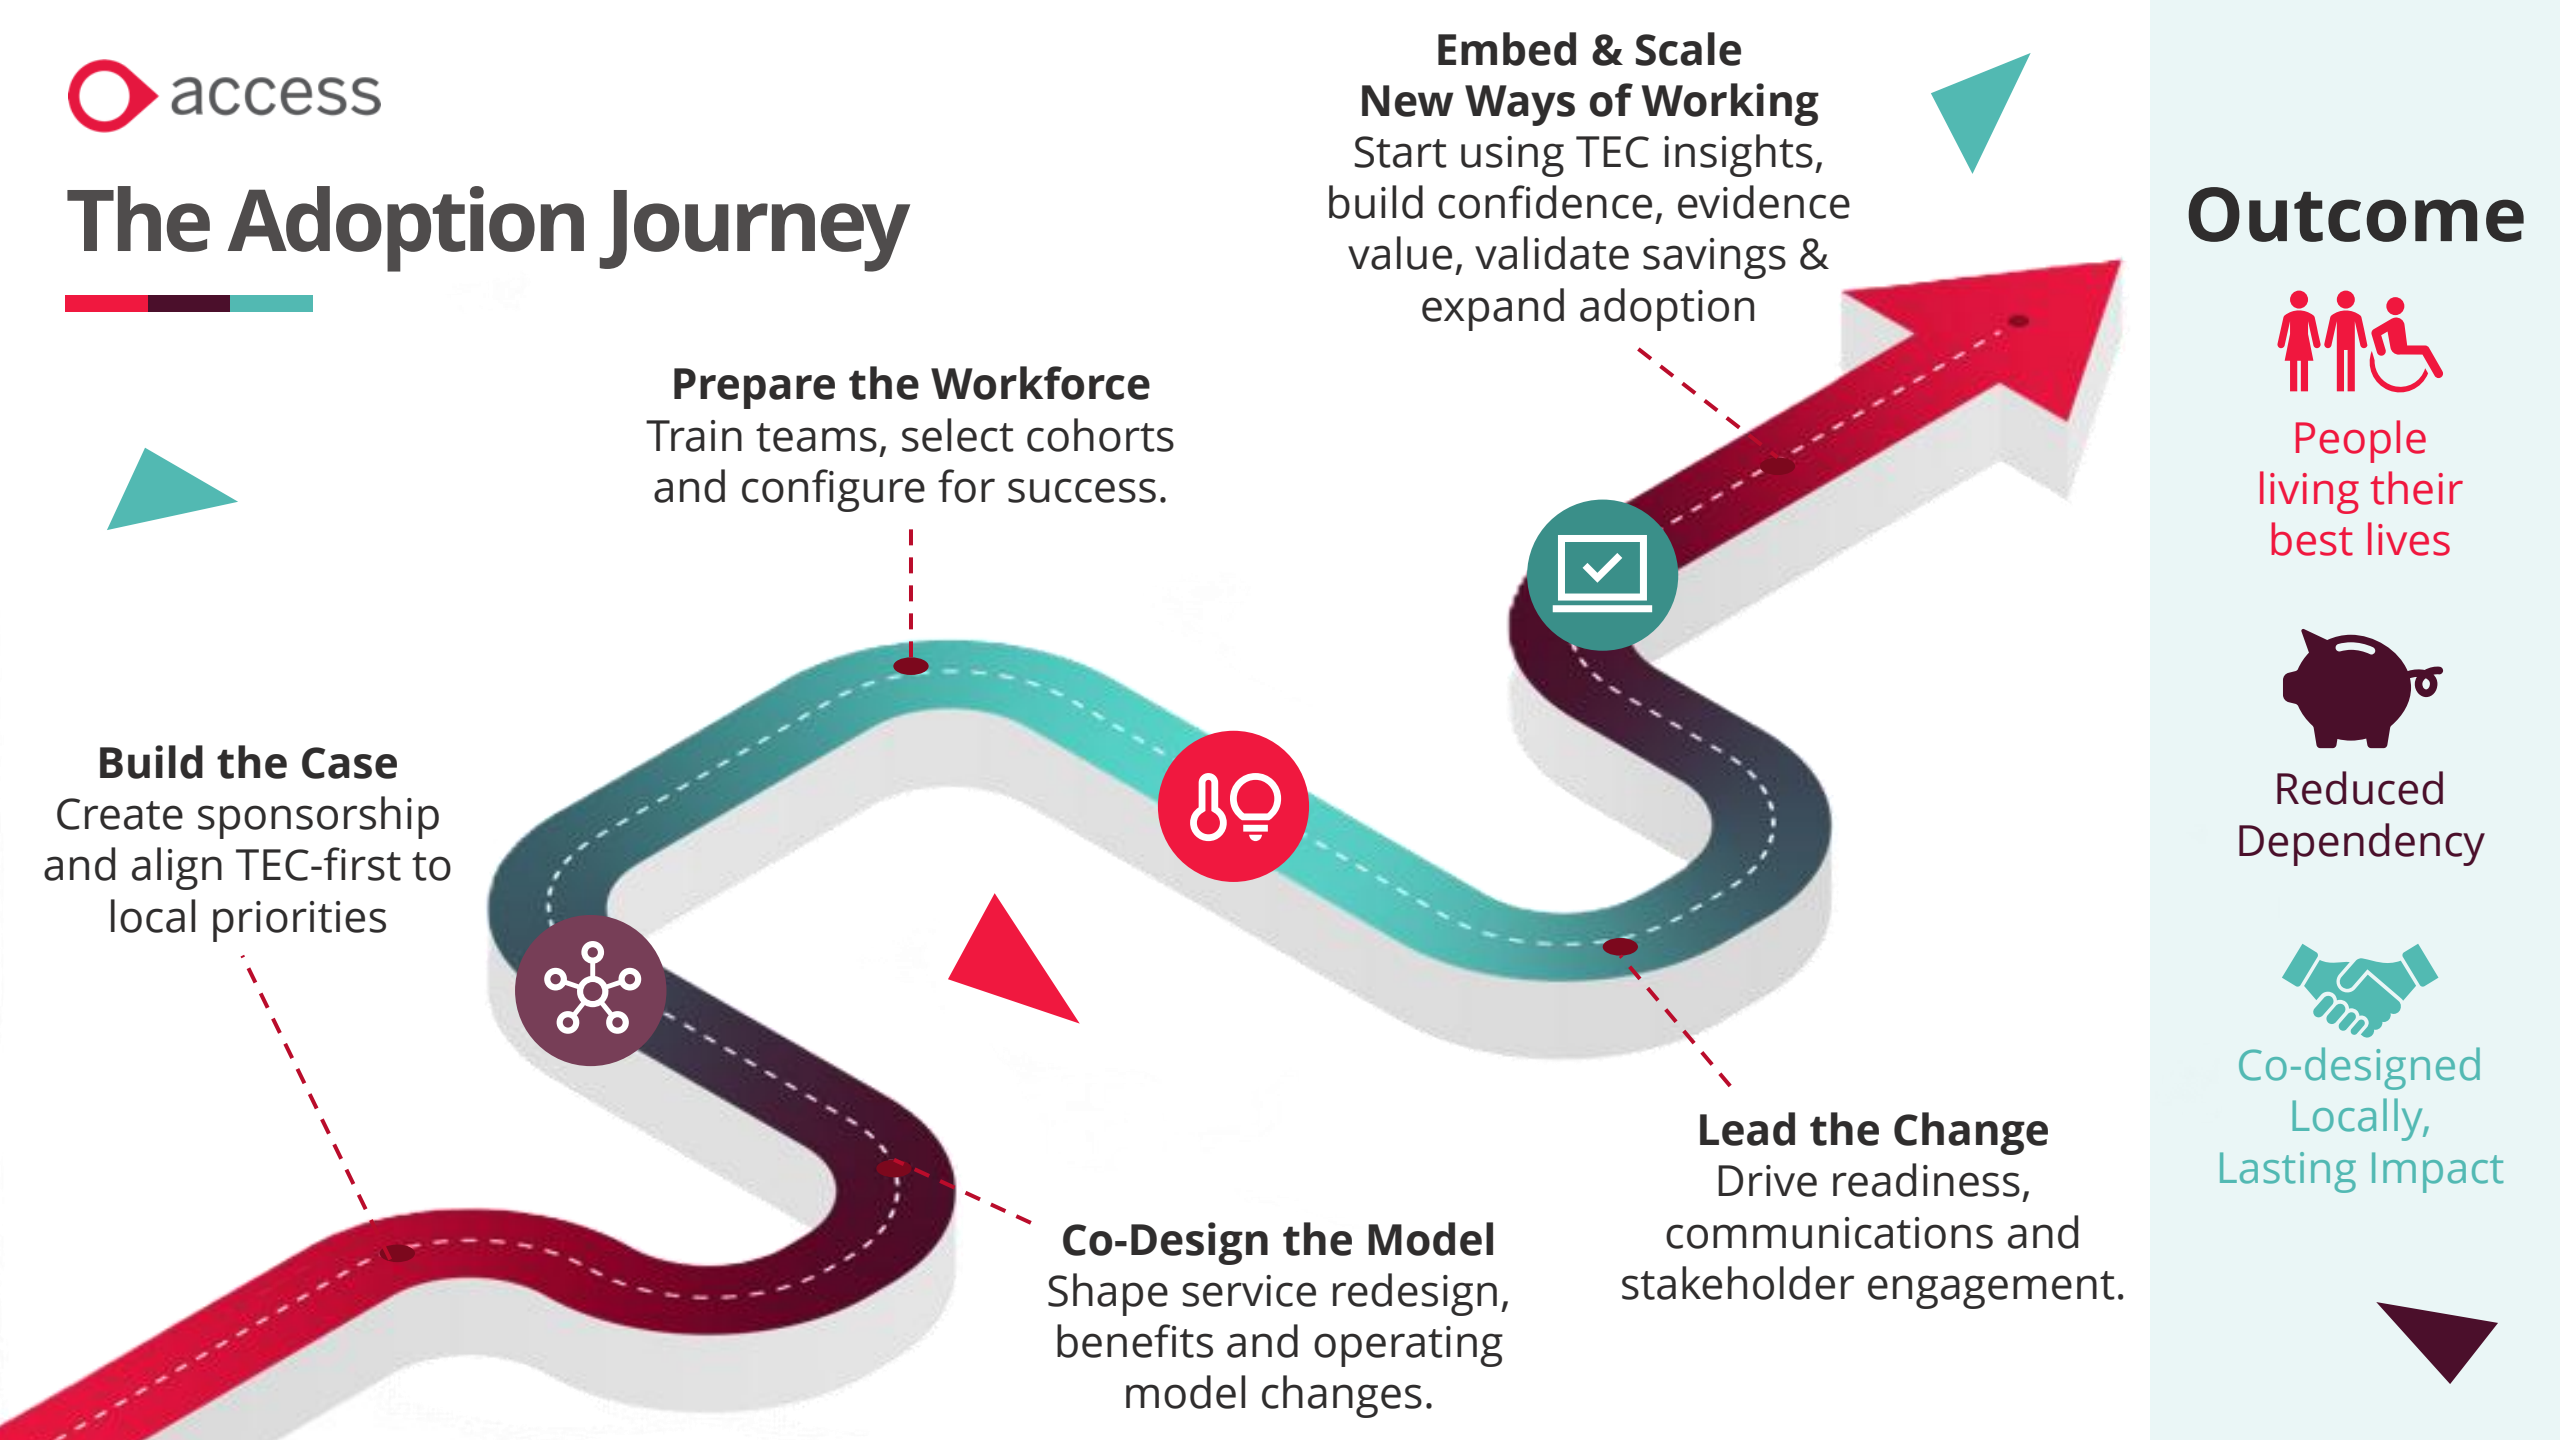

TEC Service

→ Proactive Monitoring

My service provider uses AI-powered alerts to escalate early and respond if things change

The Adoption Journey

Outcome

People living their best lives

Reduced Dependency

Co-designed Locally, Lasting Impact
