

TRANSFORMING LIVES

THROUGH DIGITAL INNOVATION

The International Technology Enabled Care Conference. Unlocking insights. Building knowledge. Improving outcomes.

TSA™

Unlocking the power of proactive and preventative care services

Sir David Pearson
Chair, TEC Quality

66%

Agree or strongly agree that **proactive TEC represents the long term future of TEC services** and will eventually replace traditional reactive approaches; efforts should focus on supporting and accelerating now.

Three Shifts:
“from hospital to community”,
“analogue to digital”
“sickness to prevention”.

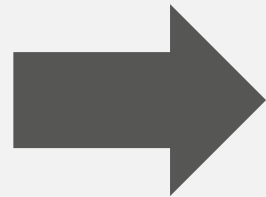

Wes Streeting
Secretary of State for Health and Social Care

directors of
adass
adult social services

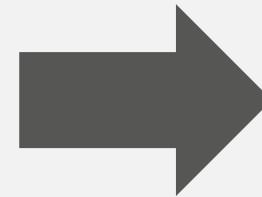

The shift towards blended models of care

PAST
A combination
of separate
physical care
and reactive
services only

NOW
A blend of
physical care,
proactive care
and reactive
care services

NEXT
**A blend of physical
care, proactive care
and reactive care
services
informed by data
and predictive
insights**

71%

Agree or strongly agree that
**the future of TEC services involved
a hybrid approach,**
combining traditional reactive
methods with proactive solutions
